

ARREST WARRANT

(DISTRICT)(COUNTY) COURT, LAS ANIMAS COUNTY, STATE OF COLORADO
WARRANT NUMBER _____

DATE FILED
August 10, 2026

CBI CASE REPORT #: 2025-0633

The People of the State of Colorado, Plaintiff

V.

Gage Vidal Montoya SSN# [REDACTED] Defendant
DOCKET TYPE: ☒ ADULT

Whereas CBI SPECIAL AGENT JACLYN GAFFNEY has made an Application and Affidavit to the Court for the issuance of an Arrest Warrant, and;

Whereas the Application is in proper form and probable cause is found to believe that the person named in the application has committed the offense(s) of

18-6-403 Sexual Exploitation of a Child (3)(b.5)- 6 count (F5).

18-6-403 Sexual Exploitation of a Child (3)(c)- 2 count (F4).

violation of Colorado Revised Statutes within the City of Trinidad, the County of Las Animas and State of Colorado;

THEREFORE, any peace officer into whose hands this Arrest Warrant shall come is hereby ordered to arrest **Gage Vidal Montoya (DOB:07/06/1989), described Hispanic male, approximately 6'2" tall and 280 pounds, with black hair and brown eyes** and bring him without unnecessary delay before the nearest Judge of the County or District Court.

It is further ordered that bond be set in the amount of No Bond Hold ** dollars.

** pending advisement

Done by the Court this 10th day of August, 2026

Time: 8:30 AM AM / PM

Judge

RETURN AND SERVICE: I have duly served this Arrest Warrant by arresting the aforementioned Defendant as required on the _____ day of _____, 2026.

Signed: _____

APPLICATION AND AFFIDAVIT FOR ARREST WARRANT

The People of the State of Colorado, Plaintiff

V.

Gage Vidal Montoya SSN# [REDACTED] Defendant

DOCKET TYPE: ☒ ADULT

The undersigned, a peace officer as defined in 16-2.5-101, Colorado Revised Statutes, as amended, being first duly sworn on oath moves the Court to issue an Arrest Warrant for **Gage Vidal Montoya (DOB:07/06/1989), described Hispanic male, approximately 6'2" tall and 280 pounds, with black hair and brown eyes**, as provided in Rule 4.2 of the Colorado Rules of Criminal Procedure.

As GROUNDS THEREFORE, the undersigned applicant states that the facts submitted in support of this request are set forth in the accompanying attachment designated as **ATTACHMENT A**, which is attached hereto and made a part hereof, and that probable cause exists to believe that the aforementioned person has committed the offense(s) of

in violation of C.R.S. 1973, as amended within the City of Trinidad, County of Las Animas and State of Colorado.

It is respectfully requested that bond on this Arrest Warrant be set in the amount of: **Standard Bond**

ATTACHMENT "A"

The following Affidavit is made in support of a request for an Arrest Warrant for **Gage Vidal Montoya** (DOB:07/06/1989), described **Hispanic male, approximately 6'2" tall and 280 pounds, with black hair and brown eyes, social security number [REDACTED] address 32017 BIG VIEW DR TRINIDAD, CO 81082, Colorado Driver's License number [REDACTED]** for committing the offense(s) of **18-6-403 Sexual Exploitation of a Child (3)(b.5)- 6 count (F5),** **18-6-403 Sexual Exploitation of a Child (3)(c)- 2 count (F4),** in violation of C.R.S. as amended, within the City of Trinidad, the County of Las Animas and State of Colorado.

INTRODUCTION AND AGENT BACKGROUND:

Your Affiant, Jaclyn Gaffney, hereinafter referred to as I, a Special Agent (SA) with the Colorado Bureau of Investigation (CBI) Major Crimes Division, states under oath that I have personal knowledge of the following information within this affidavit. The facts set forth within this affidavit are based upon information I have gained from this investigation, my personal observations, my training and experience, as well as any information provided to me by other law enforcement personnel. Since this affidavit is being submitted for the limited purpose of securing a search warrant, I have not included every fact known to me concerning this investigation, but I have set forth only facts necessary to establish probable cause to believe that evidence of a crime has occurred.

As part of my duties, I conduct criminal investigations to include crimes against children. I have received training and on the job training in cases involving the sexual exploitation of children and completed such investigations related to the possession, manufacture, and distribution of child pornography. I have observed numerous examples of Child Sexual Abuse Material (CSAM) in all forms of media. I have also participated in the execution of search warrants pertaining to the possession, manufacture, and distribution of child pornography.

RELEVANT BACKGROUND INFORMATION AND DEFINITIONS:

RELEVANT STATUTES:

This investigation concerns alleged violations of CRS 18-6-403 Sexual Exploitation of Children, relating to material involving the sexual exploitation of minors.

The elements of CRS 18-6-403 Sexual Exploitation of Children are as follows:

(3) A person commits sexual exploitation of a child if, for any purpose, he or she knowingly:

(a) Causes, induces, entices, or permits a child to engage in, or be used for, any explicit sexual conduct for the making of any sexually exploitative material; or

(b) Prepares, arranges for, publishes, produces, promotes, makes, sells, finances, offers, exhibits, advertises, deals in, distributes, transports or transfers to another person, or makes accessible to another person, including, but not limited to, through digital or electronic means, any sexually exploitative material; or

(b.5) Accesses with intent to view, views, possesses, or controls any sexually exploitative material for any purpose; except that this subsection (3)(b.5) does not apply to law enforcement personnel, defense counsel personnel, or court personnel in the performance of their official duties, nor does it apply to physicians, psychologists, therapists, or social workers, so long as such persons are licensed in the state of Colorado and the persons possess such materials in the course of a bona fide treatment or evaluation program at the treatment or evaluation site; or

(c) Possesses with the intent to deal in, sell, or distribute, including but not limited to distributing through digital or electronic means, any sexually exploitative material; or

(d) Causes, induces, entices, or permits a child to engage in, or be used for, any explicit sexual conduct for the purpose of producing a performance, or accesses with intent to view or views explicit sexual conduct in the form of a performance involving a child if the conduct in the performance was caused, induced, enticed, requested, directed, or specified by the viewer or potential viewer.

Definitions

Computer - As used herein, refers to "an electronic, magnetic, optical, electrochemical, or other high-speed data processing device performing logical or storage functions, and includes any data storage facility or communications facility directly related to or operating in conjunction with such device" and includes smartphones, other mobile phones, and other mobile devices.

Computer hardware - As used herein, consists of all equipment that can receive, capture, collect, analyze, create, display, convert, store, conceal, or transmit electronic, magnetic, or similar computer impulses or data. Computer hardware includes any data-processing devices (including central processing units, internal and peripheral storage devices such as fixed disks, external hard drives, "thumb," "jump," or "flash" drives, which are small devices that are plugged into a port on the computer, and other memory storage devices); peripheral input/output devices (including keyboards, printers, video display monitors, and related communications devices such as cables and connections); as well as any devices, mechanisms, or parts that can be used to restrict access to computer hardware (including physical keys and locks).

Computer passwords and data security devices - As used herein, consist of information or items designed to restrict access to or hide computer software, documentation, or data. Data security devices may consist of hardware, software, or other programming code. A password (a string of alpha-numeric characters) usually operates what might be termed a digital key to "unlock" particular data security devices. Data security hardware may include encryption devices, chips, and circuit boards. Data security software may include programming code that creates "test" keys or "hot" keys, which perform certain pre-set security functions when touched. Data security software or code may also encrypt, compress, hide, or "booby-trap" protected data to make it inaccessible or unusable, as well as reverse the process to restore it.

Computer-related documentation - As used herein, consists of written, recorded, printed, or electronically stored material that explains or illustrates how to configure or use computer hardware, computer software, or other related items.

Computer software - as used herein, is digital information that can be interpreted by a computer and any of its related components to direct the way it works. Computer software is stored in electronic, magnetic, or other digital form. It commonly includes programs to run operating systems, applications, and utilities.

A provider of "Electronic Communication Service" ("ECS"), is any service that provides to users thereof the ability to send or receive wire or electronic communications. For example, "telephone companies and electronic mail companies" generally act as providers of electronic communication services.

Internet - is a global network of computers and other electronic devices that communicate with each other. Due to the structure of the Internet, connections between devices on the Internet often cross state and international borders, even when the devices communicating with each other are in the same state.

Internet Service Providers (ISP) or Electronic Service Providers (ESP) - Are commercial organizations that are in business to provide individuals and businesses access to the Internet. ISPs provide a range of functions for their customers including access to the Internet, web hosting, email, remote storage, and co-location of computers and other communications equipment. ISPs can offer a range of options in providing access to the Internet including telephone-based dial-up, broadband based access via digital subscriber line (DSL) or cable television, dedicated circuits, or satellite-based subscription. ISPs typically charge a fee based upon

the type of connection and volume of data, called bandwidth, that the connection supports. Many ISPs assign each subscriber an account name – a username or screen name, an “email address,” an email mailbox, and a personal password selected by the subscriber. By using a computer equipped with a telephone or cable modem, the subscriber can establish communication with an ISP over a telephone line or through a cable system and can access the Internet by using his or her account name and personal password.

Internet Protocol (IP) Address - Every computer or device on the internet is referenced by a unique Internet Protocol address the same way every telephone has a unique telephone number. There are two IP address formats, IPv4 and IPv6. IPv4 is commonly written as four sets of numbers separated by periods such as 192.168.1. IPv6 is a larger pool of available addresses, written as eight groups of four hexadecimal digits separated by colons such as 1301:7db8:86a3:3010:0000:8a4e:0474:7104. Each time an individual accesses the Internet, the computer from which that individual initiates access is assigned an IP address. A central authority provides each ISP a limited block of IP addresses for use by that ISP’s customers or subscribers. Most ISPs employ dynamic IP addressing, that is they allocate any unused IP address at the time of initiation of an Internet session each time a customer or subscriber accesses the Internet. A dynamic IP address is reserved by an ISP to be shared among a group of computers over a period of time. The ISP logs the date, time and duration of the Internet session for each IP address and can identify the user of that IP address for such a session from these records. Typically, users who sporadically access the Internet via a dial-up modem will be assigned an IP address from a pool of IP addresses for the duration of each dial-up session. Once the session ends, the IP address is available for the next customer. On the other hand, some ISPs, including most cable providers, employ static IP addressing, that is a customer or subscriber’s computer is assigned one IP address that is used to identify each and every Internet session initiated through that computer. In other words, a static IP address is an IP address that does not change over a period of time and is typically assigned to a specific computer. A modem is an electronic device that allows one computer to communicate with another.

A “link,” “hyperlink,” “Uniform resource locator,” “URL,” or “web address” all refer to the location of a specific webpage on a computer network such as the internet. These locations are represented by a series of characters and symbols in a standard form that, when clicked, tapped, or inserted into a web browser, instructs the computer to fetch and show some specific resource (usually a web page) from another computer (web server) on the Internet. From the perspective of a computer user, that user will be *redirected* to another location or web page on the Internet or another network. URLs often take

the form of "https://www.google.com" or "https://www.justice.gov." URLs can also specify a specific page or file within a larger website, such as "https://www.justice.gov/psc" or "https://www.fbi.gov/investigate/violent-crime/vcac."

IMEI: IMEI (International Mobile Equipment Identity) is a unique identification number that identifies mobile devices.

IMSI: An international mobile subscriber identity (IMSI) is a unique number, usually fifteen digits, associated with Global System for Mobile Communications (GSM) and Universal Mobile Telecommunications System (UMTS) network mobile phone users. The IMSI is a unique number identifying a GSM subscriber.

Child - As defined in CRS 18-6-403 (2) (a), refers to any person who is less than eighteen years of age.

Storage medium - is any physical object upon which computer data can be recorded. Examples include hard disks, RAM, floppy disks, "thumb," "jump," or "flash" drives, CD-ROMs, and other magnetic or optical media.

Remote computing service - Is the provision to the public of computer storage or processing services by means of an electronic communications system.

"Records," "documents," and "materials," as used herein, include all information recorded in any form, visual or aural, and by any means, whether in handmade, photographic, mechanical, electrical, electronic, or magnetic form.

Visual depiction - Includes undeveloped film and videotape, data stored on computer disc or other electronic means which is capable of conversion into a visual image, and data which is capable of conversion into a visual image that has been transmitted by any means, whether or not stored in a permanent format.

KIK - Kik is a free instant messaging mobile app that allows users to chat using only a username instead of a phone number. Kik is mainly used for sending text messages, sharing media like photos and GIFs, and chatting with people anonymously. It is a free mobile app that lets users connect anonymously using only a username instead of a phone number.

Child Pornography/Exploitation Definitions

Sexually Exploitative Material - A photograph, motion picture, video, recording or broadcast of moving visual images, live stream, print, negative, slide, or other mechanically, electronically, chemically, or digitally reproduced visual material that depicts a child engaged in, participating in, observing, or being used for explicit sexual conduct; or a realistic visual depiction, which has been created, altered, or produced by digitization or computer-generated means, that depicts an identifiable child, in whole or in part, engaged in, participating in, observing, or being used for explicit sexual conduct.

Sexually explicit conduct - Actual or simulated (a) sexual intercourse, including genital-genital, oral-genital, anal-genital, or oral-anal, whether between persons of the same or opposite sex; (b) bestiality; (c) masturbation; (d) sadistic or masochistic abuse; or (e) lascivious exhibition of the anus, genitals, or pubic area of any person.

Child Sexual Abuse Material - Any visual depiction, including any photograph, film, video, picture, or computer or computer-generated image or picture, whether made or produced by electronic, mechanical or other means, of sexually explicit conduct, where the production of the visual depiction involved the use of a minor engaged in sexually explicit conduct or the visual depiction has been created, adapted, or modified to appear that an identifiable minor is engaged in sexually explicit conduct involving a person less than 18 years old (also known as Child Pornography).

Child Erotica - materials or items that are sexually arousing to persons having a sexual interest in minors but that are not necessarily obscene or do not necessarily depict minors engaging in sexually explicit conduct.

Bestiality - Sexual relations between a human being and an animal.

Relevant Background Information of Child Pornography

BACKGROUND REGARDING THE INTERNET AND CHILD EXPLOITATION

I have been formally trained in the investigation of crimes involving the sexual exploitation of children. I also own my own computer, have personal knowledge of the operation of a computer, and have accessed the Internet for numerous years. Based on this training and knowledge, and the experience of other law enforcement personnel involved in this investigation, I know the following:

Child Sexual Abuse Material (CSAM) creators can produce images using wireless devices such as a cell phone. Photos can also be made using cameras, then can be transferred onto another device either using wire or wireless technology. Images can also be uploaded to Internet-based storage commonly referred to as the "cloud." Hard-copy images can also be scanned into a computer. Via the Internet, connections can be made to literally millions of computers around the world. CSAM can be transferred quickly and easily via electronic mail or virtually countless other online platforms, communication services, storage services, and applications. A computer's capability to store images in digital form makes it an ideal repository for CSAM and other files related to the sexual abuse and exploitation of children. The digital-storage capacity in devices and in the "cloud" has grown tremendously within the last several years. Thumb drives with a capacity of 256 gigabytes are not uncommon. Hard drives with the capacity of 500 gigabytes up to 3 terabytes are not uncommon. Phones with 1 terabyte in storage are not uncommon. Devices can store thousands of images and videos at very high resolution. These devices are often internet capable and can not only store but can transmit images via the internet and can use the devices to store images and documents in internet or "cloud" storage spaces. Once this is done, there is no readily apparent evidence at the "scene of the crime". Only with careful laboratory examination of electronic storage devices is it possible to recreate the evidence trail.

With Internet access, a computer user can transport an image file from the Internet or from another user's computer to their own computer, so that the image file is stored in the computer. The process of transporting an image file to one's own computer is called "downloading". The user can then display the image file on his computer screen and can choose to "save" the image on his computer and/or print out a hard copy of the image by using a printer device (such as a laser or inkjet printer). Sometimes the only method to recreate the evidence trail of this behavior is with careful laboratory examination of the computer, modem, printer, and other electronic devices.

Most individuals who create and collect CSAM collect sexually explicit materials, which may consist of photographs, magazines, motion pictures, video tapes, books, slides, computer graphics or digital or other images for their own sexual gratification. Most of these individuals also collect child erotica, which may consist of images or text that do not rise to the level of CSAM but which nonetheless fuel their deviant sexual fantasies involving children. Non-pornographic, seemingly innocuous images of minors are often found on computers and digital storage devices that also contain child pornography, or that is used to communicate with others about sexual activity or interest in children. Such images are useful in attempting to identify actual minors depicted in CSAM images found during the execution of a search warrant. In certain cases, such images may also assist in determining the origins of a particular child pornography image or series of images.

The majority of individuals who create and collect CSAM rarely, if ever, dispose of their sexually explicit materials and may go to great lengths to conceal and protect from discovery, theft, and damage their collections of illicit materials. They almost always maintain their collections in the privacy and security of their homes, cars, garages, sheds, and other

secure storage locations, such as in a digital or electronic format in a safe, secure, and private environment, including in cloud-based storage online or on their person.

Based on my training, knowledge, experience, and conversations with others in law enforcement, I understand that an individual who possesses images and/or videos depicting child pornography on one digital storage devices and/or Internet email or online storage account is likely to possess child pornography on additional digital storage devices and/or Internet email or online storage accounts that s/he possesses. Additionally, based on this training and experience, I understand that an individual who discusses the sexual abuse and/or exploitation of children on one digital storage device is likely to conduct those communications on additional digital storage devices that s/he possesses.

INITIAL INFORMATION:

The National Center for Missing and Exploited Children (NCMEC) is an organization that, among other things, tracks missing and exploited children, and serves as a repository for information about child pornography. NCMEC also receives information from Internet Service Providers (ISP), Online Service Providers (OSP) and other Internet based social websites that may relate to the online exploitation of children. NCMEC analysts review information reported to them by various social media platforms/websites to determine jurisdiction for the reported incident. NCMEC places this information into a report called a "Cybertip," which is assigned a unique number for tracking purposes. Internet Crimes Against Children (ICAC) is comprised of multiple lead agencies and affiliated agencies. Colorado Springs Police Department (CSPD) is the task force lead agency for Colorado ICAC. Lead agencies receive Cybertips directly from NCMEC. Once the information in the Cybertip is reviewed by the lead agency, the Cybertip is securely transferred and assigned to the appropriate jurisdiction for further investigation. Cybertip (206804296) was assigned to Las Animas County Sheriff's Office (LACSO).

On September 2, 2025, LACSO requested assistance from CBI due to a conflict of interest. On September 15, 2025, I was assigned to the case by CBI Supervisory Special Agent (SSA) Chris Adams.

INVESTIGATION:

I reviewed Cybertip (206804296). The information received by NCMEC was reported by MediaLab/Kik. Kik reported that on February 17, 2025, at approximately 11:30:54 UTC, five videos containing apparent Child Sexual Abuse Material (CSAM) was sent via Kik messenger in a private chat to another unknown Kik user. Kik provided the following user information regarding the sender of videos containing CSAM: Email Address: [REDACTED] Display Name: Cori Slav; Username: Donttellthewife1654, ESP User ID: donttellthewife1654_70b.

Kik provided four videos of suspected child abuse material. Two of the video files appear to be duplicates based on the filenames. The videos were of sexually exploitative material of children involving Bestiality. NCMEC described the videos as possible self-production. In an effort to reinforce the content of the CSAM image files, I elected to describe the following videos:

File one - (fcfce347-33f3-4577-9703-c1e972863076) - This is a short color video of a female child and an Alaskan Malamute type dog engaging in Bestiality. The recording is short and estimated to be shorter than thirty seconds. The female child appears to be pubescent, judging on the female's facial structure, hair style, body stature, sound of her voice and clothing. Based on my training, experience as well as life experience, the child's facial features appear that of a pubescent female due to no make up on her face, which shows her youthfulness. The child has full cheeks, rounder softer facial shape, among other youthful facial structures. The child's hair is full, long, and tied in a ponytail. The child has a slender body stature, absence of muscle mass or curves. The females voice sounds youthful as it is higher pitched.

The child and dog are outside and under what appears to be inside an open-sided construction/loafing shed. The child is clothed in a blue T-shirt with a white cartoon drawn bunny rabbit or similar character on the front of it. It appears the child is unclothed from the waist down. The child is propped on her hands and knees. It appears her knees are resting on a cloth material. The dog is behind the child and during the video, the dog mounts the rear of the child, thrusting its pelvis against the child buttocks area. The female child initially stayed in the position on her hands and knees, but toward the end of the video, appears to feel discomfort. The female child's face grimaces as she rises to her knees, groans in pain, and attempts to remove the dog from her. The video is angled to face the front of the female child and dog. There is no view of

the dog penetrating the female child; however, when the child is attempting to remove the dog from the rear of her, it appears the animal had penetrated her given her movements and the grimacing of her face.

File two – (e96949e4-39dd-4164-b024-c18e3ffcf5be) - This is a color video of a female child and a Pitbull type dog engaging in Bestiality. The recording is short and estimated to be under one minute in length. The female child appears to be pubescent, judging on the female's facial structure, sound of her voice, hair style, body structure and structure of the female child's exposed vaginal area. The child in this video is clothed in a t-shirt, but nude from the waist down. The child appears to have braces on her teeth and a youthful round soft structured facial shape. The child has a slender body stature with the absence of muscle mass or curves of her exposed buttocks, vaginal area, and thighs. Her vaginal area appears that of a pubescent female due to the appearance of the vulva and absence of pubic hair. The child and dog are in a dimly lit room. The video begins with a view of the female's face; the child's face is grimacing. The video then briefly shows the dog's face. The dog is positioned behind the female, mounting the female from behind. The video quickly shifts focus to the dog penetrating the female's anus. The female child is moaning during the video, which sounds as if the child is in pain. The video ends after focusing on the dog penetrating the child.

Previous investigators tied the uploaded sexually exploitative videos' IP addresses to internet service provider Starlink. A search warrant was served to Starlink for IP address information; however, it yielded no results due to the search warrant being served after Starlink's retention period.

This Cybertip (206804296) was reported on February 17, 2025. In October 2025, ICAC Investigators linked two previously reported Cybertips to this Cybertip. The two Cybertips linked were reported to NCMEC by Synchronoss Technologies Inc. Synchronoss Technologies is the cloud-based storage provider for content stored on the Verizon Cloud. Those two Cybertips were reported December 2022 and February 2023. On December 17, 2022, NCMEC received a report from Synchronoss Technologies, regarding a single uploaded file containing possible CSAM. This was linked to Cybertip 141642622. And then again on February 20, 2023, NCMEC received a report from Synchronoss Technologies who reported another single uploaded file containing possible CSAM. This was linked to Cybertip 155765122.

For both Cybertips, Synchronoss Technologies reported the following user information: Telephone number: 7196803109, Email Address: gage.montoya@yahoo.com, Customer Information: Gage Montoya, Address: 32017 Big View Drive, Trinidad, Colorado 81082. Both tips were flagged for CSAM; however, both suspected files of CSAM were determined to be age difficult and investigators were unable to determine if the subjects in the files were minors. The email address used for the Synchronoss Technologies account is the same email address linked to this Cybertip and the reported Kik account.

Through open source and law enforcement databases, the email, [REDACTED] was also linked to the telephone number provided from Synchronoss Technologies, Inc. [REDACTED] and name and address of Gage Montoya (DOB 07061989) 32017 Big View Drive Trinidad, CO 81082; corroborating the information from Synchronoss.

A search warrant was submitted to the identified carrier of the telephone number, Verizon Wireless, regarding that number from Synchronoss Technologies Inc. Verizon Wireless confirmed the following subscriber information:

- The phone number is registered to Gage Montoya
- Gage Montoya is listed as the Email Owner with email [REDACTED] MTN effective date of 04/22/2015
- The cell phone manufacturer name listed as Samsung Galaxy

The email address [REDACTED] was reported on all three Cybertips. [REDACTED] was the email address used to register for the Kik account associated with the upload of the previously described CSAM videos. The Kik account was closed due to deactivation concerning CSAM images; however, the Yahoo account was not flagged due to it not being tied to CSAM images or videos.

I received a judicially approved search warrant for the Yahoo email address gage.montoya@yahoo.com. I noted the following during review of the account. The subscriber information for the Yahoo account showed the account registered to Gage Montoya (DOB:07-06-1989) as of March 1, 2009. Recovery Phone: [REDACTED] (the cell phone previously linked to Gage Montoya). Recovery Email: [REDACTED] Open source and law enforcement websites and databases showed the email address [REDACTED] to be linked only to Gage Montoya. Gage Montoya has a daughter named [REDACTED]

I also located emails regarding Gages cell phone number [REDACTED] and the associated address of Gage Motoya. There were also emails to and from Gage Montoya's employer Colorado Department of Corrections (CDOC), emails in which Montoya mentions his wife, [REDACTED] and auto ship confirmations showing Montoya's current address 32017 Big View Drive, Trinidad, CO as recently as 11/07/2025.

I obtained a search warrant for the Media Lab/KIK user account linked to the CSAM uploads. Kik provided four videos of suspected child abuse material. Two of the video files appear to be duplicates based on the filenames. These two videos were found intermingled within the photo content and other pornographic type photos/videos. There were some videos within the account involving bestiality with adult male/females. There were no other CSAM images/videos located with the photograph content. I noted that there were some photos of females who appeared young but were age difficult. These photos were not explicit. I was unable to determine if the females were under the age of 18. It was uncharacteristic as these females photos were cropped to cut others in the photos out of the picture.

Also intermingled within these photos and videos, I located one selfie type photograph of Gage Montoya (see below). Showing account ownership.

Kik provided chats from the reported account/username: Donttellthewife1654. The chat messages extended from December 2024 to February 2025. Throughout the chats, the username donttellthewife1654_7ob would rotate between posing as an adult male or female and at times identified as a female under 18 years of age. There were conversations in which donttellthewife1654_7ob stated he sold videos on KIK and requested CashApp payments. I did not locate any conversations that indicated transactions transpired, but chats indicating the videos involving bestiality with dogs were shared.

There were sexually explicit chats donttellthewife1654_7ob would entertain with persons under the age of 18. In the following chat, there is an explicit conversation between donttellthewife1654_7ob and a username who stated she is 15 years of age. From the chat, it appears there was an explicit photo exchange with the child. There was no indication of a meeting or continued conversation. KIK's chat retention period is 60 days before permanent deletion. These accounts were not preserved prior to my investigation.

In the following chat, donttellthewife1654_7ob is posing as 19-year-old female and talking of bestiality with a dog. The video reported to NCMEC involved an Alaskan Husky type dog as described above. A husky is mentioned within the chat. donttellthewife1654_7ob requested payment for the video. The conversation dwindles and it does not appear there was money transferred.

donttellthewife1654 7ob requesting money for the video.

Each image was labeled under Snapchat.jpg. This is more than likely because the cell phone operating system (Android or IOS) identified the file as a JPEG image generated while the Snapchat app was active or saving the screenshot to a specific folder within the phone. I noted during my review of the data I received from the KIK return, the chats often centered around moving the conversation to Snapchat.

In an effort to reinforce the content of the CSAM image files, I elected to describe each image.

Snapchat – 441933787.jpg – Is a color photograph of a pubescent female, nude from the waist up. The photograph is cropped showing the females face and exposing her breasts.

Snapchat – 606277195.jpg – Is a color photograph of two, pubescent females, fully nude, wet, and in the shower. The females are standing near one another, with the photograph angled to capture only the rear of their bodies and not faces. The female on the left side of the photograph is exposing her vaginal area. Her vaginal area appears that of a prepubescent/pubescent female due to the appearance of the vulva and absence of pubic hair. Both are angled in a way to see a sideview of their breasts.

Snapchat – 715951099 - Is a color photograph of two pubescent female children. Both are fully nude, wet, and in the shower. The photograph is cropped in a way to only expose the breasts of the female standing in the front. There are no other body parts of either child exposed.

Snapchat – 1715711342 – Is a color photograph of the same two pubescent female children from the photograph titled Snapchat – 715951099. It appears both females have wet hair and are standing outside a glass shower door. The females are fully nude from the waist up and exposing their breasts.

Based on the aforementioned information, I would respectfully request that probable cause be found that **Gage Vidal Montoya (DOB:07/06/1989)** did within the County of Las Animas and State of Colorado, commit in violation of the Colorado Revised Statutes, the offense(s) of §18-6-403 Sexual Exploitation of a Child as he possessed and distributed the two sexually explicit videos of pubescent female children reported by Media Lab/KIK through digital and electronic means through Kik's messenger application. Gage Montoya also possessed four photographs of pubescent female children within a folder on his Synchronoss Technologies Inc. account.

CONCLUSION:

1. Based on the investigation described above, probable cause exists to believe that the person described in Attachment A, will be found in violation of the following Colorado Revised Statutes:

18-6-403 Sexual Exploitation of a Child (3)(b.5)- 6 count (F5),

18-6-403 Sexual Exploitation of a Child (3)(c)- 2 count (F4),

2. I, therefore, respectfully request that the attached warrant be issued authorizing the arrest of **Gage Vidal Montoya (DOB:07/06/1989)**

I declare under penalty of perjury that the foregoing is true and correct to the best of my information, knowledge, and belief.

Based upon the aforementioned information, Your Affiant respectfully requests the Court issue an Arrest Warrant for **Gage Vidal Montoya (DOB:07/06/1989)**, described **Hispanic male, approximately 6'2" tall and 280 pounds, with black hair and brown eyes, social security number [REDACTED] address 32017 BIG VIEW DR. TRINIDAD, CO 81082, Colorado Driver's License number [REDACTED]** for committing the offense(s) of **18-6-403 Sexual Exploitation of a Child (3)(b.5)- 6 count (F5),**

18-6-403 Sexual Exploitation of a Child (3)(c)- 2 count (F4).

violation of C.R.S. as amended, within the City of Trinidad, the County of Las Animas and State of Colorado.
